

BAND ALL

Increase label area without compromising product exposure

The Band-All MR series banding machines are the ideal option for label applications. This new label is versatile and applied quickly and efficiently in either semi-automatic mode or in-line as a fully automated solution. The labels are heat-sealed and do not require adhesive. This allows both sides of the label to be used with the underside being available for promotions, coupons, instructions or recipes. The label can be printed with up to six colors with full photo rendition on a variety of materials from polypropylene to paper. Bandwidths range from 1" – 4". This is also a perfect alternative to safety or tamper evident bands.

Ideal applications include:

- Sealed trays
- Hinged Trays
- Lidded trays/containers
- Domes
- Clamshells
- Tubs
- Formed Packs
