

BAND ALL

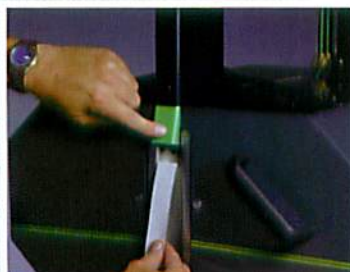

Bundle everything
including trays, special offer packaging,
printed material and other delicate products.

Program, save and operate with easy to
read, easy to use six-button control panel.

Increase speed and reliability with
our patented tape infeed system.

Improve production with fast and
easy material changeover.

Fast, Reliable, Easy to use, Economical

■ The innovative and easy to use Band-All is engineered and manufactured to provide the fastest, most consistent banding and bundling. Band-All offers:

- Reliable banding at a rate of up to 40 bands per minute.
- Mechanically efficient operation (few moving parts).
- A unique arch system with vacuum assisted tape in-feed.
- An easy to read LCD screen to display machine settings.
- Standard and custom arch sizes available in four bandwidths.

■ PLC- based operation (Programmable Logic Controller) allows:

- Easy operation and excellent versatility.
- Tamper proof lockout (eliminating unwanted changes to settings).
- Full automation in standard or custom configurations.
- Integration of stand-alone models into automated systems.
- Customization with time and labor saving options.
- Effortless changeover from paper to plastic banding material.

■ Our patented infeed system and cost effective heat-sealing process allow:

- Use of banding material from light to heavyweight grades.
- Operation with low cost paper or plastic banding material.
- Selection of four standard bandwidths from 1-1/8- 4 inches.
- Use of plain or custom printed material in paper or plastic.

We know banding!
